

WHAT IT DOES

Three core functions

ANONYMIZE

Anonymizes bilingual memoQ documents.

CLEAN

Removes low-value and duplicate segments, detects similar segments and inconsistencies, and lets users choose which version to keep.

QA

Includes an integrated QA tool for file validation before delivery.

INSTALLATION AND LAUNCH

Prerequisites

- ☐ Windows 10 or later
- ☐ Updated Google Chrome

- 1 Unzip the ZIP file into a folder of your choice.
Example: C:\CleanQA
- 2 Install Python 3.12.10 or similar if needed. During setup, select both options below.
 - ☐ Use admin privileges when installing pip
 - ☐ Add python.exe to PATH
- 3 Double-click Clean&QA.exe. The required Python packages install automatically. This is only needed the first time and may take 5-10 minutes.
- 4 Double-click Clean&QA.exe again. The application opens automatically in your browser.

If the browser does not open:
<http://localhost:5000>
